AppeSide
WHITE PAPER

Introduction

AppeSide is a universe of useful utilities and applications designed specifically for the Ape world.

It all started with the mega popular NFT collection: "BAYC" now the ecosystem includes CryptoPunks and Meetbits as well as the Otherside metaverse and now the mega promising ApeChain blockchain has been launched.tion

Now the APE World is growing fast and needs useful utilities and applications! AppeSide will solve these problems and start launching useful utilities and applications for the quickly growing APE World!

Ecosystem
AppeSide is developing and launching soon:

AppeSide Buy Bot: Useful bot for the Ape blockchain. Any project can easily customize it and embed it in their group to receive Important Buy Notifications. The bot will contain important data for investors: Buy Amount, Actual Project Price, MCAP, links to Dextools/Dexscreener and other links needed by the project as desired. Notifications can be customized in your own style for each project

AppeSide Checker Bot: This bot will be useful primarily for investors to have all the useful tools forthe APE network in one place. In it you will be able to check any APE project: Mintable | Mutable Info | Creation TX | Ownership Renounced | Creator Address | Creator Balance | Token % Creator | Freezable as well as LP Burn | LP Locked.
Additionally, a wallet address tracking feature will be implemented in the APE network. So that you can receive notifications from Whale balances on the APE network or those APE wallets you want to monitor.

AppeSide Sniper Bot: Another useful bot for the APE world. You will be able to make the fastest buys among new projects on the APE blockchain. Most new tokens are traded only on DEX, and you would like to be able to buy or sell tokens at the price you want like you do fixed orders on CEX. Our useful tool will help you with this now you will be able to set the desired buy price of the project you are interested in in our useful tool and our bot will buy automatically when the price drops to these values or vice versa automatically sell your coin and fix your profit at the price you would like.

AppeSide Bridge Swap: Many people have problems in making a quick swap of their assets because the assets may be on the ERC20 or BEP20 network and they need to quickly get assets on Arbitrum for example. Our app that is about to be launched will help with this in a simple and fast Swap between different blockchains. This will allow many investors to quickly swap between different blockchains of EVM networks.

Now you can quickly, securely and in a few clicks exchange your ETH to WAPE for example and buy the token you need on this network!

New useful utilities and applications will be added to our list very soon

Tokenomics
AppeSide build on APE

- CA: 0x12D25b543dc98b8C85a60467faC5e9f18bDfbc3c
- Name: AppeSide
- Symbol: APPESIDE
- Network: ApeChain
- Max supply: 1,000,000,000 AppeSide
- TAX: 0/0
- Contract Ownership Renounced

All of our useful tools will initially be free of charge. However, additional features in our useful tools as well as AppeSide bridge swap fees when exchanging coins between different blockchains will be in our useful AppeSide tokens.

AppeSide token deflation mode: When paying AppeSide bridge swap commissions and paying for additional features in our utility tokens, a portion of the payment in AppeSide tokens will be burned. Thus our revolving amount will be burned and our token value will increase with the growth and development of ApeChain.
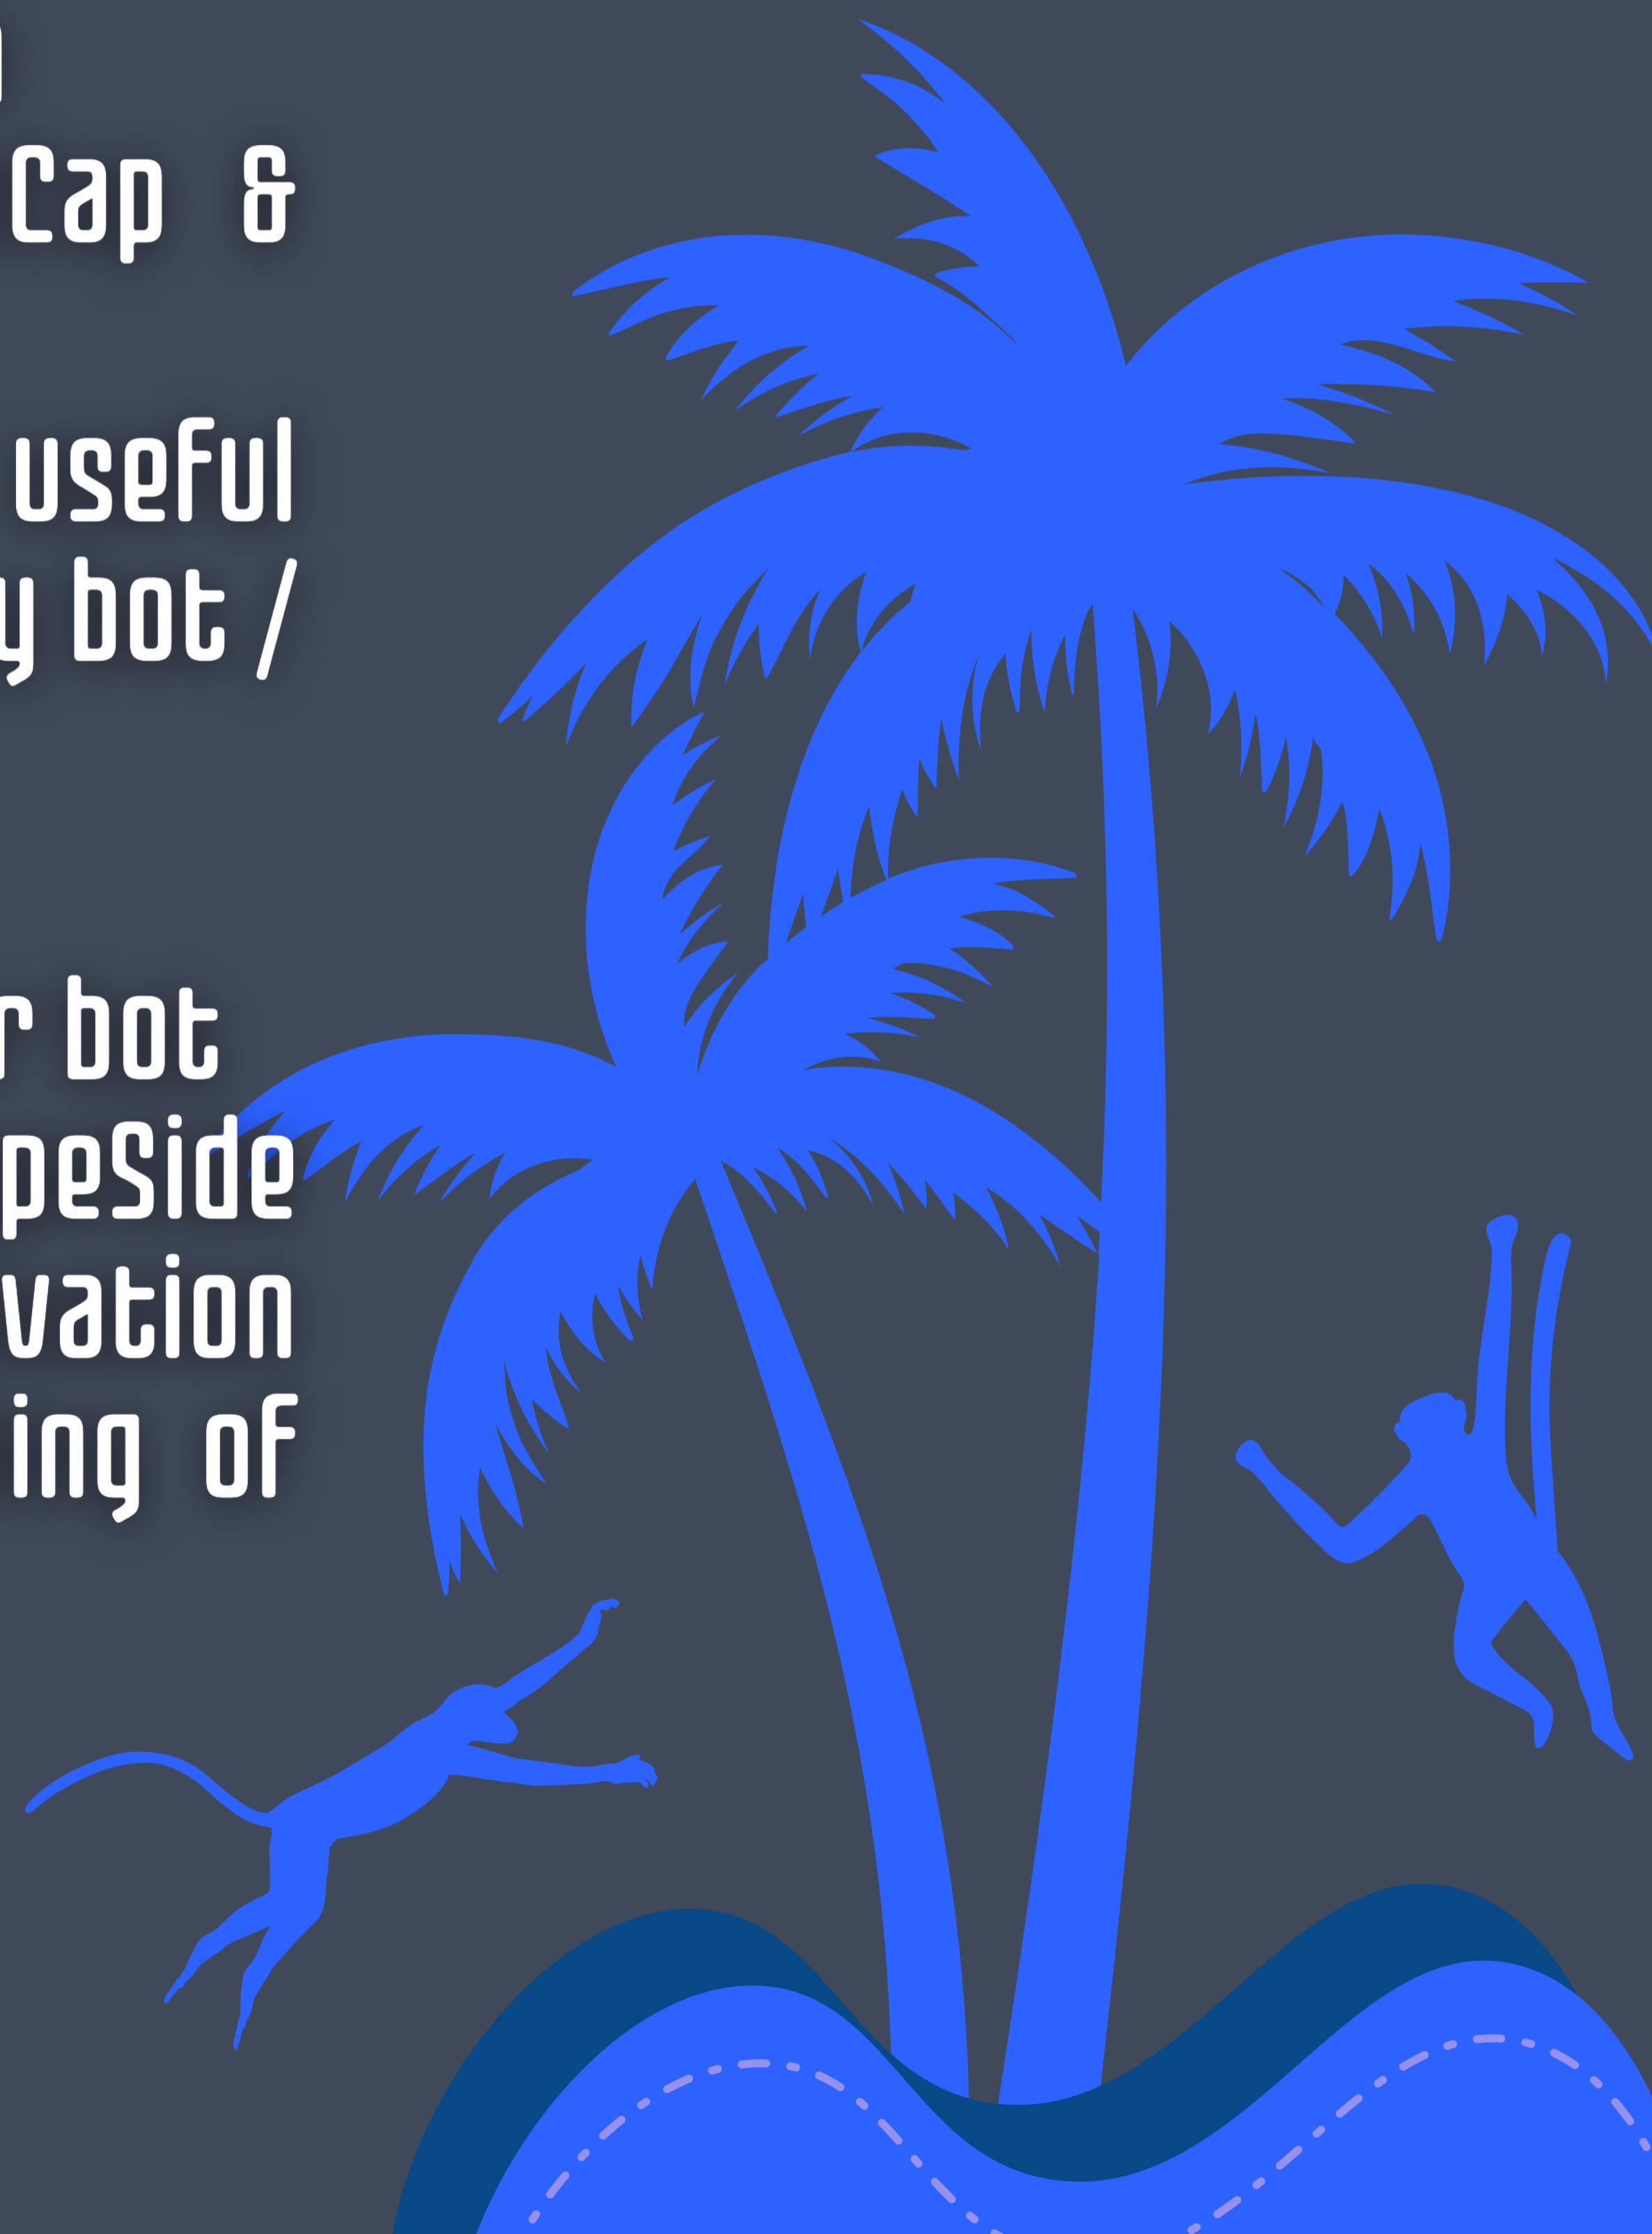

RoadMap

01 (STAGE 1) Q4 2024

- Launch of the Appeside project
- Launch of trading on DEX
- Marketing and Promotion
- Listings on CoinMarkeCap & Coingecko
- Launch of the first few useful AppeSide apps: Appeside buy bot / Appeside checker bot
- First CEX Listings
- Launching Appeside Sniper bot Implementation of AppeSide Token Deflation Mode (activation of paid services and burning of AppeSide tokens)

02 (STAGE 2) Q1 2025

- New partnerships and development of the AppeSide ecosystem
- Launching Appeside bridge swap
- New CEX Listings on major CEXs
- AppeSide ecosystem update and announcement of new useful tools
- New data very soon xplains how a company aims to make money
